

MAINTENANCE AND OPERATION OF SPECIAL USE AREAS

Mr. Fitzwater also requested that GSA delegate authority to the Agency to take over maintenance and operation of all Special Use Areas in the Headquarters Building including all the utilities support systems supporting these areas. Mr. Davis was also informed that GSA was unable to perform all of the preventative maintenance on these areas and that we have a historical record of requested and performed work documented in our computerized preventative maintenance program file for GSA review as necessary. Mr. Davis requested we provide GSA with a more specific proposal in terms of what we are talking about.
